OLD BUSINESS

1) Green Development Practices Checklist

Ms. Asselstine gave the Board an update. Ms. Roberts will present a draft at the February meeting.

Mr. Misiura suggested that the document be more Hightstown specific – adaptive reuse.

Discussion on requirement that applicant testify.

Mr. Slauch – Checklist normally means something that must be submitted for an application for development. Checklist would have to be adopted by ordinance in order to be enforced.

Ms. Asselstine – It will not be called “checklist.” Suggested Green Development Practices Review. Instead of yes/no questions would be more open ended - how you will address or achieve specific goals.

Ms. Wright – Noted that the standards would need to be concrete if they are required and adopted by the ordinance.

COMMITTEE AND PROFESSIONAL REPORTS

Ms. Asselstine – Resolution will go to Council next week authorizing application to NJDOT for local bicycle and pedestrian assistance program for technical assistance in preparing a Mobility Master Plan; request to Boards, Commissions and local organizations to provide letter of support for this application.

Contacted by Greater Mercer TMA regarding Silver Letter recognition of Hightstown's Safe Routes to Schools Recognition Program.

Downtown Hightstown will hold a "Meet and Greet" January 28 at 7 p.m. at 12 Farms. Mr. Montferrat encouraged Board members to attend.

Mr. Misiura gave the Board an update on the Rug Mill Redevelopment; Mayor and Councilman Misiura will be meeting Tuesday, January 15 with the new developer. Budget 2019 – rezoning Westerlea Apartments (create overlay zone), Fair Share Housing, Gateway Rezoning. Board asked Mr. Slauch to provide a budget for these proposed projects.

There being no further business Mr. Montferrat asked for a motion to adjourn. Motion made by Mr. Jackson and seconded by Mr. Balcewicz. All ayes. Meeting adjourned at 8:36 p.m.

Respectfully submitted,

Re: Green Development Checklist
Borough of Hightstown, Mercer County, New Jersey
Our File No.: H1759

Dear Sandy:

Attached to this letter please find a copy of the original Green Development Practices Checklist received from the Environmental Commission at the December Planning Board, and an updated checklist which has been modified to be specific to Hightstown.

Since the December 2018 Planning Board Meeting, Beverly Asselstine and I have been corresponding in regard to recommended modifications to the Green Development Practices Checklist that would make the checklist specific and appropriate to Hightstown. The checklist attached to this letter is the checklist that both Beverly and I recommend be approved by the Planning Board. This checklist would be provided to Applicants to complete and respond to and would notify Applicants that Green Development is important to the Borough; that the Borough would look favorably upon the use of Green Development Practices; and the Borough will review this checklist during the larger Planning Board process. This checklist is a guide for all site and subdivision applications. The checklist is not a requirement for Applicants and Applicants may or may not choose to modify their plans to correspond to the checklist.

Should you have any questions, I will be available to review this with the Planning Board at their meeting of February 11, 2019.

Very truly yours,

Carmela Roberts, P.E., CME
Borough Engineer

BOROUGH OF HIGHTSTOWN
GREEN DEVELOPMENT PRACTICES CHECKLIST
January 2019

This "Green Development Practices Review" is intended to function as guiding principles for those pursuing development projects in the Borough of Hightstown in order to help achieve the goal of making this a more sustainable community. The practices are offered as a review document to enable flexibility to be progressive and innovative, since many of these practices are still being incorporated into the mainstream of the development industry. It is expected that these items will facilitate more sustainable development. Sustainable development seeks to balance environmental, economic and social aspects of a proposal such that the resulting project will be efficient in cost, impact and function. This document is not intended to be exclusive; incorporation of additional "Green Development Practices" similar to these items is strongly encouraged. Borough staff will be using this document to review the "green" character of an application and may offer suggestions to improve the sustainability of the project.

By incorporating this checklist into the Borough plan submission checklist, developers will be encouraged to consider "Green Development Practices" with the genesis of the project program.

Applicants will be asked to provide testimony and support documents to describe the actions or practices that will be incorporated into their proposal, including verification subsequent to implementation.

Green Development Practices Categories

- A. LANDSCAPE – Landscape plantings / ecosystem management
- B. WATER – Potable water use and disposal
- C. STORMWATER – Stormwater management and harvesting
- D. ENERGY – Energy use and generation – climate design
- E. RESOURCES - Materials and species – preservation – recycling – reuse
- F. SOCIAL – Promote community interaction – gathering – pride – health
- G. AIR – Reduce air pollution / restore air quality

This list of green building practices includes suggested additional elements that can be incorporated into building design. These tend to introduce sustainable design practices into the building itself as opposed to the previous checklist which focuses on site improvements. These are offered as supplemental ideas for applicant consideration and discussion with the Borough; the Applicant is not obligated to provide specific intentions on any of these at this time.

Water Use Reduction

Maximize water efficiency within buildings - use high efficiency fixtures, dry fixtures such as waterless urinals, and occupant sensors to reduce the potable water demand. WATER

Recycled Content

Specify a minimum of 25% of building materials that contain in aggregate, a minimum of 20% post-consumer or 40% post-industrial recycled content material. RESOURCES

Construction IAQ (Indoor Air Quality) Management Plan

Develop and implement an AQ Management Plan for the construction and pre-occupancy phases of the building. Can use the Sheet Metal and Air Conditioning National Contractors Association (SMACNA) AQ Guideline for Occupied Buildings under Construction, 1995. AIR

Low-Emitting Materials

Reduce the quantity of indoor air contaminants, e.g., VOCs from adhesives, sealants, paints, composite wood products and carpet systems, that are odorous or potentially irritating to provide installer and occupant health and comfort. AIR

Commissioning

Verify and ensure that fundamental building elements and systems are designed, installed and calibrated to operate as intended. ENERGY

Green Roofs

Implement green roof planting on flat roof multi-story buildings - alternatively implement light color for roof surface. ENERGY

Energy Star

- 1) Incorporate Energy Star-labeled building products, lighting, heating and cooling, appliances, and plumbing. 2) Achieve Energy Star certification for residential or commercial buildings.
