Public Health Update 2019 Coronavirus Outbreak (COVID-2019) March 2, 2020

West Windsor Health Department continues to monitor the COVID-19 outbreak and work with local officials and community partners to implement recommendations from the Centers of Disease Control and Prevention (CDC) aimed at controlling the spread to our communities. There are currently no cases confirmed in our area and the risk of local exposure remains low for the general public. While we do not know the future impact COVID-19 will have in our area, experts advise that we should prepare for person to person spread. The following resources and links are provided to assist families in taking proactive steps to prepare for the potential spread of this disease.

- ❖ Steps Families Can Take to Prepare - (Click on the link for a checklist.)

The resources listed below were prepared for flu outbreaks, however much of the information can be applied to COVID-19 response.

- ❖ The Home Care Guide for Flu – (Click on the link for the Guide)
- ❖ FEMA Planning Resources link at: <https://www.ready.gov/pandemic>
- ❖ Nonpharmaceutical Interventions (NPIs) – CDC link at: <https://www.cdc.gov/nonpharmaceutical-interventions/home/index.html>

This is an evolving situation and the public is encouraged to remain informed. For the most up-to-date and credible information, please monitor the websites listed below or call the NJDOH COVID-19 Hotline, 24/7, at 1-800-222-1222.
