**Re: Preliminary & Final Site Plan for
Peddie School – Stadium Renovation Project
Lot 1.02, Block 53; Ward Street
Hightstown Borough, Mercer County, NJ**

Dear Ms. Davis:

With regard to the above referenced project, submitted on September 30, 2025, requesting preliminary and final site plan approval to renovate the football stadium, it has come to our attention that a request to temporarily delay submission of the Best Management Practice Maintenance Manual for the proposed stormwater Management system was not provided.

Please accept this letter as a waiver request to delay the submission of the Maintenance Manual so that we may incorporate any comments from the Board's professionals. We suggest, should the board find it appropriate to grant approvals, that the Maintenance Manual would be submitted as part of resolution compliance.

Thank you in advance for the Board's and the Board's professionals' consideration of this request.

Should you have further questions, please do not hesitate to contact me.

Sincerely,

Lorali E. Totter, P.P., P.E.
