

New Jersey Environmental Infrastructure Financing Program USEPA Public Awareness of SRF Assistance Requirements

Construction of upgrades and improvements to water main and water services on Maxwell Avenue; and construction of upgrades and improvements to water services on Summit Street, Cole Avenue, Clinton Street, Bennett Place were financed by the New Jersey Environmental Infrastructure Financing Program (NJEIFP). The NJEIFP is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Environmental Infrastructure Trust (Trust) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Trust to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits that result in increased water pressure and the elimination of lead services for residents and businesses in the Borough of Hightstown.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
