

## **New Jersey Environmental Infrastructure Financing Program USEPA Public Awareness of SRF Assistance Requirements**

Construction of Improvements to the Influent Pump Station Drywell were financed by the New Jersey Environmental Infrastructure Financing Program (NJEIFP). The NJEIFP is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Environmental Infrastructure Trust (Trust) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Trust to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide clean water benefits by ensuring safe and continuous operation of the Influent Pump Station, which is a critical component of the Advanced Wastewater Treatment Plant (AWWTP) serving residents and businesses in the Borough of Hightstown, Mercer County, New Jersey.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
